PROFESSIONAL SUMMARY

Computer Science undergraduate with hands on experience in software development penetration testing, web application security, and threat detection. Record in responsible vulnerability disclosure, CTF competitions, and building security integrated systems. Seeking for an opportunity to apply software development and security expertise in a professional environment.

EDUCATION

B. Tech in Computer Science & Engineering | Amrita Vishwa Vidyapeetham

2023 – 2027

Relevant focus areas: Cybersecurity, Cloud Computing, Machine Learning, Application Development

TECHNICAL SKILLS

Security Domains: Penetration Testing, Web Application Security, OWASP Top 10, SIEM, Threat Intelligence, Active Directory Attacks, Cloud Security, Red Teaming, AI Security

Security Tools: Burp Suite, Wireshark, Nmap, Havoc C2, Caldera, Prowler, ScoutSuite, Potnet, Syswisper, WAZUH, Suricata, Sysmon

Programming Languages: Python, JavaScript, PHP, SQL, C#

Frameworks & Platforms: Docker, Kubernetes, MySQL, NoSQL, AWS CLI, Git, Postman

PROFESSIONAL EXPERIENCE

Web Security & Backend Developer Intern | Taiyari24

May 2025 – Aug 2025

- Identified, analysed, and remediated web application security vulnerabilities, strengthening overall application security.
- Designed and implemented secure APIs using secure coding best practices, reducing attack surface across multiple application features.
- Conducted comprehensive API security and functional testing via Postman, validating pre-existing endpoints for correctness, authentication, and input validation.

KEY PROJECTS

Deep Learning Based XSS Detection System | Python, CNN, LSTM

- Engineered a real time Cross Site Scripting (XSS) detection system combining CNN and LSTM deep learning architectures, achieving 99.08% classification accuracy on a dataset of 107,000 web samples.
- Demonstrated advanced understanding of web attack vectors, data modelling, and ML based threat detection applicable to modern security operations.

Conversational SIEM Assistant with NLP | Python, WAZUH, Suricata, Sysmon, NoSQL

- Building an NLP powered SIEM assistant that automates threat investigation workflows and generates real time security incident reports, reducing analyst response time.
- Integrating WAZUH, Suricata, and Sysmon for comprehensive endpoint and network security event monitoring and high volume log analysis.

Automated Web Pentesting System | Python, NoSQL

- Built an MCP server integrated with Claude Desktop to automate penetration testing workflows, enabling seamless interaction between AI and security tools.
- Used Nmap for reconnaissance and fed results into automated modules to test SQLi, XSS, and SSRF vulnerabilities.

CERTIFICATIONS & ACHIEVEMENTS

- Responsible Disclosure: Identified and reported a stored XSS vulnerability in the Smart India Hackathon 2025 (AICTE, Gov. of India) submission portal, leading to successful remediation.
- CTF Competitions: 24th Place out of 22137 participants – NCIIPC-AICTE Pentathlon 2025 (National Cybersecurity CTF, Govt. of India); 7th Place – Shunya CTF 2024 (National Finals); 99th Place – HackQuest CTF 2025.
- Red Team Workshop: Selected among top 40 students nationally to attend a Government of India funded Bootcamp on Red Teaming by Professional Hackers.
- Hackathon: Honorary Mention – Microsoft Ignite Hackathon; Shipped roviks.com within 3 months.
- Certifications: AWS Certified Cloud Practitioner; Google Cybersecurity Professional Certificate; Google Cloud Computing & Generative AI; Ethical Hacker – Cisco Networking Academy; Introduction to CIP – OPSWAT Academy.

LEADERSHIP & COMMUNITY

- Security Researcher @ bi0s and Caff3in3-DB; Built 3+ active applications for Amrita Vishwa Vidyapeetham, Bangalore
- President @ NSDC AVVB; Backend Developer @ F.A.C.E AVVB; Web Developer @ IEEE SB AVVB.
